

MRV

Rectangular Expansion Joint

Custom model stainless steel rectangular expansion joint composed of single- or multi-ply unrestrained bellow with V-shape corners, for mounting with welding ends or flanges up the pipeline.

Available with optional inner sleeve for bellow's protection and improved stability and/or blocking system. Couplings can be made out of various carbon-steel or stainless steel grades.

For detailed technical specifications on MRV axial expansion joints please check the following table and documents or [contact us](#).
