

MWY Double Hinged Expansion Joint

Custom model stainless steel angular expansion joint composed of double single- or multi-ply bellows with hinged system, for mounting with welding ends up the pipeline.

Construction with double hinged system for better compensation. Available with optional inner sleeve for bellow's protection and improved stability. Couplings can be made out of various carbon-steel or stainless steel grades.

For detailed technical specifications on MWY expansion joints please check the following table and documents or [contact us](#).
